

## Did you know?

- You should not wear loose dentures. Loose dentures can cause excessive friction and pressure toward the gum tissues and bones, resulting in painful sore spots and bone shrinkage.
- Dentures can warp if placed in hot water.
- Dentures can change shape if they dry out. When not in use, cover dentures with water or a denture-cleaning solution to prevent them from drying out.
- Dentures should be brushed inside and outside daily with a soft, large nylon denture toothbrush with round-ended bristles. Use denture creams instead of toothpastes, which are too abrasive and will scratch your denture. Rinse with cold water.
- Your mouth is constantly changing. Inspect your denture regularly for worn teeth. Be sure to visit your dental professional regularly as part of your recommended check up schedule.
- Some medications can affect denture fit and wearability so be sure to discuss this with your doctor and dental professional.
- Only your dental professional is qualified to diagnose your oral health and adjust your denture or partial.
- Most dental insurance policies will pay for a new denture every 5 years.
- Worn and stained dentures can make you look older and cause your dentures to function poorly.

# A denture you can really *live with!*

Not all dentures are made with the same materials or technique. Sometimes the material used to create the “pink tissue” (gum) portion of dentures can shrink when it’s processed, leaving you with a denture that is uncomfortable to wear and irritates your mouth. You can feel insecure when doing everyday things (like smiling or eating), and develop sore spots.

IvoBase Precision Dentures are different. Our materials compensate for potential shrinkage, so the denture base fits securely and comfortably when you wear it. So, you’ll have the confidence to eat, talk, smile, and laugh any time!

## *Benefits to Smile About*

**Look Great** —Precision dentures by IvoBase Precision look like beautiful, healthy teeth and let you choose the shades and shapes for your perfect smile.

**Feel Strong & Confident** —The high impact strength and accurate fit of precision dentures eliminate worries about damage and breakage, letting you do whatever comes naturally, like smiling, speaking, laughing and eating foods you love.

**Be Healthier** —Dentures that fit well, resist plaque and bacteria, and prevent unwanted irritations leave your mouth healthy and free of tissue inflammation.

**Eliminate Denture Odor** — IvoBase Precision dentures have a non-porous surface, which helps to reduce odor-causing bacteria and plaque, leaving your mouth cleaner.

**Use Less Denture Adhesives**—These precision dentures fit naturally, securely, and comfortably, so you won’t need to rely on denture adhesives as much.

## *You CAN have a more natural looking, healthier denture smile!*

Other dentures. Lifting caused by shrinkage and poor fit.

IvoBase Precision Dentures. Provide an accurate, secure fit.

IvoBase Precision Dentures are made from smart, thermo injection technology, so dentures resist staining and absorbing embarrassing odors.

Precision dentures are made using state-of-the-art materials and processing techniques, so they fit properly and are strong and durable for worry-free wear.
